

Palette identification

Advantages

- ◆ **Automation was achieved**
 Since workers had identified the sticker case visually, a misreading was caused due to misplacement stickers. By introducing RFID system, the process becomes smooth and man-hour was reduce.
- ◆ **Easy to add**
 Up to 256 kinds of cases can be easily identified. Even when adding cases, just attach tags.

In the outboard motor manufacturing process, identify wirelessly the case containing the stickers for sticking to the body of the outboard moto. Put the tag with the data number entered in to sticker case, and manage which case (sticker) is always in which place.

① Using the ID reader / writer, write data to the ID tag from the PC

Connect via RS-232C or USB

② Put on the ID tag with the data written in to the sticker case.

③ Take a sticker with vacuum

④ Switch empty case and stock case.

⑤ Identify case number with tag
