

They are the people who decided to charge the AGV battery wirelessly. Everyone seems happy.

It's hard to replace a battery manually.

It seems that there was a problem with charging the AGV last time. This is the third time this year ... Wouldn't it be better to charge wirelessly? Can our AGV be charged wirelessly?

I'm worried about how to charge the AGV battery ... Charging can be done wirelessly. I know! It's good because the man-hour for battery replacement is reduced.

We still replace manually...

Wireless power supply

B&PLUS released the system that can be retrofitted to our AGV. The simulation report for free!!

How do you charge the AGV battery?
The battery can be charged wirelessly.
We will simulate for free!

What's the simulations?

That is a good question!

We won't take your time. Let me check the situation about the AGV and battery you are using now! If you are going to introduce AGV in the future, you can do it!

Just check 5 points.

request → simulate → Get a report within 2 days!

We will make a report that shows how much battery you have lost and the benefits of wireless charging.

Easy to understand, and fast!

We propose the best charging system!

So you can safely consider wireless charging of the battery.

It's not too much work. If we get the results right away for free, I want to try it!

Wireless power supply by
B&PLUS

Just contact us!

Prepare a report according to the informations.

Check only the 5 points!

- ① Battery type and battery capacity.
- ② Confirmation of travel / stop time * Travel time / stop time per cycle.
- ③ Current consumption
Current consumption during running / stopping / resting
- ④ Can it be charged while stopping?
- ⑤ Daily working hours
Check start time / end time / lunch break / break / day of AGV operation.

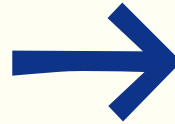

Even though we can not visit you, charging simulation can be done.

We can prepare the report

even if the battery type, capacity or cycle etc.
are not specifically determined.

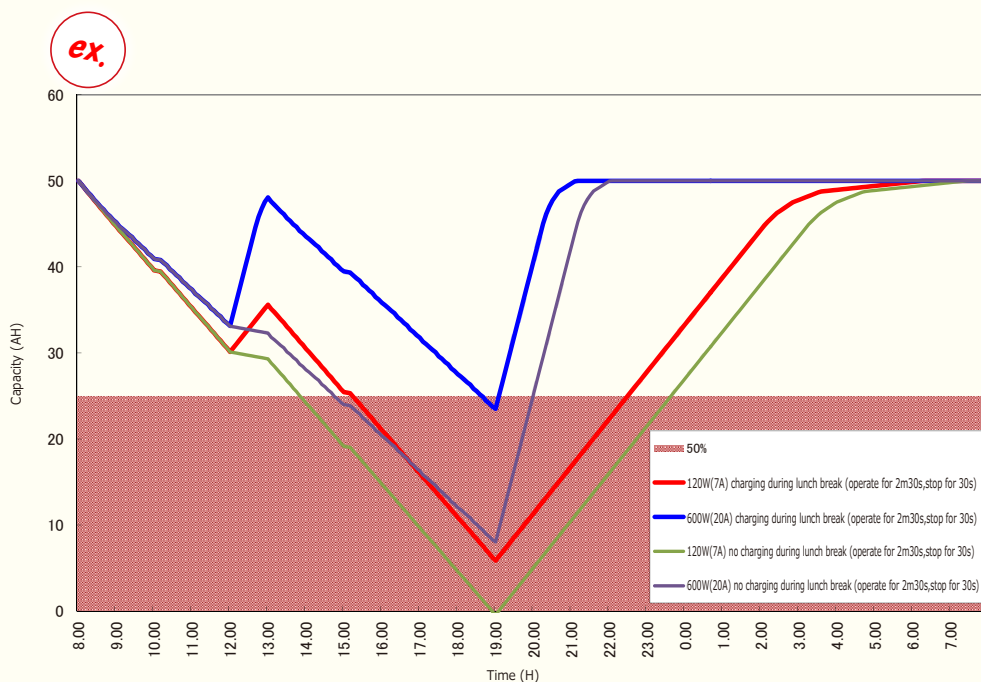

Thank you for contact us.

We prepare the customer special report.

As the results are provided fast, please consider carefully and choose!

We will show you the parallels of current situation and after the introduction with using the documents such as below.

We will propose the best operation method for you.
Please feel free to contact us.
